

Product Range Data Sheet

Description

The Metalite Range of finishes is a timeless crafted collection of real metals applied to the substrate. Designed to bring reality within reach, our range of Bronze, Brass, Copper and other special metals can be applied to virtually any surface.

This real metal can then be aged, distressed, polished or waxed, or simply left to age gracefully. Suitable for interior and exterior use in commercial, residential, and public spaces with high demands to appearance.

The Metalite Range brings together the art of careful craftsmanship and partners very well with the architectural market where quality and consistency are paramount.

It is a hand finished process. You can expect variances which will only add to the authenticity of your finish.

Properties

- Natural aged finish
- Provides instant historical value
- Excellent finishing characteristics
- Natural colour stability
- Ages timelessly
- Compatible with anti-corrosion pre-treatment systems

Durability

- Good natural weatherability
- Internal & external
